

Environmental Policy

Mitsubishi Logisnext Europe AB will develop and produce trucks, taking into account environmental impacts.

Through knowledge of the truck's own environmental impact and our own objectives, we must work towards continuous improvement and meet relevant environmental legislation, directives and regulations.

Our handling of environmental and health hazardous products and wastes should be carried with minimal risk to environment and health.

We shall in our choice of resources and its consumption safeguard a sustainable society.

Environmental work must be transparent to both employees and external stakeholders.

It is management's responsibility to ensure that our employees have the necessary environmental expertise and adequate resources for the realization of our environmental policy.
